

# User Acceptance Testing (UAT) Document

---

Date	26 June 2025
Team ID	LTVIP2025TMID53479
Project Name	OrderOnTheGo: your on-demand food ordering solution
Maximum Marks	

## Project Overview

Project Name: OrderOnTheGo

Description:

OrderOnTheGo is a MERN stack-based on-demand food ordering solution. It enables users to browse local restaurants, order food online, make payments, and track their orders. It includes real-time order updates, admin management, and restaurant dashboards.

Version: v1.0.0

Testing Period: 2025-06-15 to 2025-06-27

## Testing Scope

- User registration and login
- Restaurant registration and menu management
- Browse and search restaurants and food items
- Cart management and checkout
- Payment processing
- Order placement and tracking
- Email/SMS notifications
- Admin panel for managing users and restaurants
- User reviews and ratings
- Responsive design across devices

## Requirements to be Tested

- As a customer, I want to easily register, login, and place food orders.
- As a restaurant owner, I want to manage my menu and incoming orders.
- As a delivery agent, I want to update order statuses in real time.
- As an admin, I want to manage users, restaurants, and monitor platform health.

## Testing Environment

URL: <https://orderonthego.example.com>

Credentials:

- User: user@example.com / user123
- Restaurant: rest@example.com / rest123
- Admin: admin@example.com / admin123

## Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
